# Alcon

# We Help People See Brilliantly.

At Alcon, we aspire to lead the world in innovating life-changing vision products because when people see brilliantly, they live brilliantly.

Each year our products touch the lives of millions of people living with conditions like cataracts, glaucoma, retinal diseases, and refractive errors. We offer the most complete line of ophthalmic surgical devices, as well as a differentiated portfolio of contact lenses, lens care solutions, and pharmaceutical and over-the-counter eye drops. Alcon is also at the forefront of innovation, partnering with Eye Care Professionals to bring the gift of sight to more people around the world.

That's been our legacy for more than 75 years—and continues to guide our focus towards the brilliant future ahead.

# CHALLENGING THE STATUS QUO IN GLAUCOMA WITH YOU

We know that as ophthalmologists you work tirelessly to transform the lives of people with glaucoma. Faced with issues such as treatment adherence, caused by a range of factors including ocular surface disease,<sup>1</sup> ophthalmologists work with medical treatment options that have stayed broadly the same for 25 years.<sup>2,3</sup>

## It's time for a change.

For over a century, Santen has been committed to protecting the precious sense of sight. In pursuit of better eye health for all, our mission is to build a portfolio that supports ophthalmologists in meeting the diverse needs of their patients.

Stay tuned to know more.

[LABORATOIRES-THEA.COM](http://LABORATOIRES-THEA.COM)

Théa is a company with deeply European roots, whose independence, stability, and entrepreneurial spirit are guaranteed by the Chibret family, who have been leaving their mark on the world of ophthalmology for the last 150 years.

Being a family-owned business has allowed Théa to develop over the long-term, focusing on employees and human values to accomplish our mission of being the “Ophthalmology Specialist”. A pioneer in preservative-free treatments, we are committed to providing healthcare professionals and patients with innovative products and a wide range of speciality items (service products, daily-use products) across all ophthalmological therapeutic categories.

We are continually reinvesting in our two main areas of interest, Innovation and Internationalisation, with long-term strategy being favoured over short-term profits.

Our goal is to pursue and strengthen long-term partnerships and collaborative research, to share our expertise and address unmet medical needs to provide new methods for treating and supporting patients. Internationalisation is in our genes: currently the top independent pharmaceutical company in Europe, Théa has set its sights on becoming a world leader by continuing to export its products and establish itself internationally, while always respecting the cultures of each country.

**This vision  
is what makes Théa unique.**
